LUXURY TOILET HOME

MIRA

LEATHER
LOOK

Luxurious cat toilet home

Finally a toilet home you don't have to hide!

This beautiful toilet home deserves a prominent place in your home because the design adds style to any interior.

The cat litter house is made of high-quality plastic and the leather-look finish gives it a luxurious look.

The high-performance carbon filter works 5 times better than the filter in an ordinary litter box, so you won't be bothered by unpleasant smells in the house.

And thanks to the non-slip feet under the four legs, the toilet home stays in place and your floor stays scratch-free.

To clean the tray, first secure the door and simply open the front panel. The inner tray of the toilet home has high edges all around, so that the cat litter and urine stay neatly inside the box.

This cat toilet home is individually packaged in a box with a full-colour poster and is very easy to assemble yourself.
